

Background: The Town of Arrowsic has activated a Wi-Fi signal at the town hall building. Any device that connects through this signal will be utilizing the town's single DSL connection.

The purpose of this policy is to assure that the signal is available for people conducting or engaged in town business and to reduce the risk of inappropriate use.

Policy

The Town of Arrowsic authorizes use of the Wi-Fi signal by anyone using a device to access the internet for conducting town business or for other purposes if they are otherwise engaged in town business (e.g., attending a town meeting, taking a break during work for the town).

The Town will maintain a Wi-Fi signal that will be available to anyone conducting or engaged in town business.

- The password for this signal can be given out by any town official or active committee member.
- This password will be changed periodically as required.

This policy will be reviewed if use of the Wi-Fi signal interferes with town business or abusive uses are detected.

Notes: This policy supersedes the Wi-Fi policy approved November 12, 2012
