6:20 Any other business

- Rte. 127 Construction: Conversation between MDOT representative and Walter: He indicated that if we know we can get the money, probably have between 6-8 months to make changes. The money's allocated but can't guarantee the funding beyond that point. Group is looking for larger culvert to the North and making sure both culverts are of adequate size. Grant for hydrodynamic modeling but not necessarily in time for the project. Need for Georgetown Select Board to get together with Arrowsic Select Board. Important to not delay this.

Eventually something in writing needs to be shared with MDOT representative that we are working with Georgetown; MDOT representative said he needed to know by the end of June. A couple of grant opportunities for hydrodynamic modeling can be looked into as well as contact with elected representatives. Coordination of study funding, construction funding, and political lobbying then formation of committee to deal with this will be spearheaded by group led by Claire Enterline.

- Kahrl Tree: A fir tree celebrating Judith Kahrl will be put in town green, and money removed from property maintenance account.
- Update on Energy Efficiency grant due June 4. The solar contract has been signed, waiting for deposit to come through, size of array 18 kilowatts, enough to cover most of the town hall buildings.

- Discussion of Sewall Propane Contract for 26/27: DeeDee motioned to approve; Jennifer seconded; all approved.
- Annual Report: final draft of report at printer. Warrant will be ready the beginning of next week with signatures needed before Thursday.

6:40 Mail

- Midcoast Humane Agreement for Services: Select Board directed Irene to sign and submit
